PROFESSIONAL SUMMARY

Full Stack Web Developer specialising in Python-based back-end systems and React-powered front-end interfaces. Delivered two production-deployed applications featuring AI-driven applicant scoring, real-time WebSocket chat, and Razorpay payment integration. Currently contributing to live client projects as a Python Full Stack Developer Intern at SAC Academy. Seeking a junior developer role where I can build scalable APIs, integrate third-party services, and ship user-facing features.

TECHNICAL SKILLS

Languages:	Python, JavaScript (ES6+), HTML5, CSS3, SQL
Frameworks:	Django, Django REST Framework, FastAPI, React.js
Databases:	PostgreSQL, MySQL, SQLite
APIs & Auth:	REST API Design, Google OAuth 2.0, JWT Authentication, Email OTP, Gemini AI API
Payments:	Razorpay Payment Gateway, Webhook Handling, Refund Logic
Tools & Deploy:	Git, GitHub, Vercel, Render, PythonAnywhere, VS Code, Postman
Other:	WebSocket, Real-time Communication, CORS Configuration, bcrypt, AJAX

PROFESSIONAL EXPERIENCE

Python Full Stack Developer Intern — SAC Academy

Aug 2025 – Present

Kannur, Kerala

- Delivered full-stack web application features using Django, FastAPI, and React.js, reducing manual back-end processing time by streamlining API workflows.
- Designed and implemented 10+ RESTful API endpoints with JWT authentication, cutting unauthorised access vulnerabilities to zero in tested environments.
- Improved codebase maintainability by introducing Git branching strategies and pull-request workflows across a 3-member development team.
- Deployed and managed application environments on Render and Vercel, achieving consistent uptime for staging and production builds.

NOTABLE ACHIEVEMENTS

- Built and deployed 2 full-stack production applications independently as a self-taught developer prior to formal employment.
- Integrated Gemini AI API into a job portal to automate applicant scoring — reducing recruiter screening effort for each job posting.
- Implemented end-to-end Razorpay payment gateway with webhook verification and refund handling in an e-commerce platform.
- Achieved live deployment of both projects on cloud platforms (Vercel, PythonAnywhere) accessible to real users.

PERSONAL PROJECTS

Job Portal — AI-Powered Recruitment Platform

Live Demo | GitHub

FastAPI · React.js · PostgreSQL · Google OAuth 2.0 · Gemini AI · WebSocket · Vercel · Render

- Architected role-based access control system supporting 2 distinct user types (recruiters and job seekers) with separate dashboards.
- Automated applicant ranking using Gemini AI API, enabling recruiters to evaluate candidates faster without manual shortlisting.

- Built real-time messaging between recruiters and candidates using WebSockets, eliminating need for external communication tools.
- Secured application with Google OAuth 2.0 login, removing password management overhead for end users.

Goaly — Sports E-Commerce Web Application

[Live Demo](#) | [GitHub](#)

Django · PostgreSQL · Razorpay · Email OTP · PythonAnywhere · GitHub

- Delivered a complete e-commerce solution with product catalogue, cart, checkout, and order tracking for a sports retail use case.
- Integrated Razorpay payment gateway handling secure transactions with automated order confirmation on payment success.
- Reduced unauthorised access risk by implementing email OTP two-factor authentication for all user accounts.
- Built a custom admin dashboard enabling non-technical store owners to manage products, categories, and orders independently.

EDUCATION

Higher Secondary Certificate (HSC)

2023 – 2025

Science Stream | Govt. Higher Secondary School, Ulikkal, Kerala

Secondary School Certificate (SSC)

2021 – 2022

Govt. High School, Perinkary, Kerala

LANGUAGES

Malayalam (Native) · English (Professional Working Proficiency)
